

Knife Sharpening – Part 1

I'll try to keep this straight forward and comprehensive

Step 1. Tool you will need: - Chainsaw file - really only needed for removing excess metal

File one side

File both sides

Just take your time and be patient and avoid over filing divots or narrow parts of your knife.

Step 2. Tools you will need: - EZE Lap or Stone

Approx. angle $22\frac{1}{2}\%$
from centre of blade
